FROM POOR AIR TO PUREAIR

Bathroom Fan with Odour Sense Technology

Functions & Settings

Icon	Function
	Speed
	Timer
	Multicolour function button is lit depending on the active function (see table below)
	Self-adjusting humidity control
	Continuous operation
	Light, odour & app connectivity sensor

Touch Panel

The front of the fan includes an intuitive, easy to use LED touch panel. Users can see which fan function is active by viewing the multicoloured LED indicator, as well as customising the fan's functions and boost speeds using the touch menu. For full description on the touch panel, please refer to the tables on the right.

Vent-Axia Connect App

With the Vent-Axia Connect app, you can customise multiple functions according to your particular conditions. This is highly practical if the fan is mounted in the ceiling and the touchscreen is hard to reach.

For a full detailed guide on how to use the app please see the online app walkthrough downloadable from www.vent-axia.com/pureairsense.

LED function colour	Function
None	The fan is off or activated for continuous operation
Blue	The fan is boosting due to increased humidity
Flashing Blue	The fan is sensing the environment and re-calibrating to assess its humidity surroundings
Green	The odour sensor has activated the fan and is boosting
Purple	The fan has started the airing function-after 26hrs of inactivity
Yellow	The overrun timer is active - triggered via light sensor or switch live
Flashing Yellow	The delay timer is counting down, flashing more quickly towards the end
