

# DigiCard RFID Prepayment Card Meter – Summary Sheet

## Summary

The DigiCard RFID is the latest technology in card prepayment meters. The meter is now a sealed unit, requiring customers to simply hold their cards close enough to the meter for the credit to be transferred. RFID technology makes the meter tamper proof, unlike coin and standard card meters. This 100 Amp meter is MID approved and can be set up with two tariffs, perfect for Economy 7. Building owners can purchase payment cards, which can be sold to the end consumer to top up their meter, allowing payment to be received in advance of receiving the bill. We also supply a programming card allowing the cost per unit to be changed, as well as configuring emergency credit, standing charge and debt collection.

While easy to program on site, we can pre-program your meter for you prior to dispatch. Just select the optional extra and enter your requirements upon placing your order.

Product Code	PP5
Power Supply	Single Phase
Payment Type	Card
Max Current (Amps)	100
MID Approved	Yes
Smart	No
Tariffs	Single   Dual
Availability	Next Day
Condition	New
Brand	DigiCard
Country of Manufacture	China
Width	125.0mm
Height	180.0mm
Depth	65.0mm
