AIR QUALITY INNOVATION

High power. In-shower

Low on sound. High on performance

Combining low noise levels with high extraction power, Simply Silent™ Shower Fans are purpose-designed for in-shower installation. They carry out direct extraction right at the point of humidity for a steam-free bathroom environment. In fact, an installed Simply Silent™ Shower Fan achieves an 88% improved extraction rate over comparable in-line shower fans.

So Simple Installation

Because they're positioned directly in the shower cubicle itself, they're quick and easy to fit. Plus, they aren't subjected to the loft space temperature extremes that in-line shower fans are. They also come with an installation kit, which includes external grille and 3m flexible ducting.

Quick-fit clamp

The built-in So Simple quick-fit clamp allows the fan to be secured simply to ceilings.

Larger cable access

Larger cable access slots enable easy wiring.

Radial fixing points and level reference

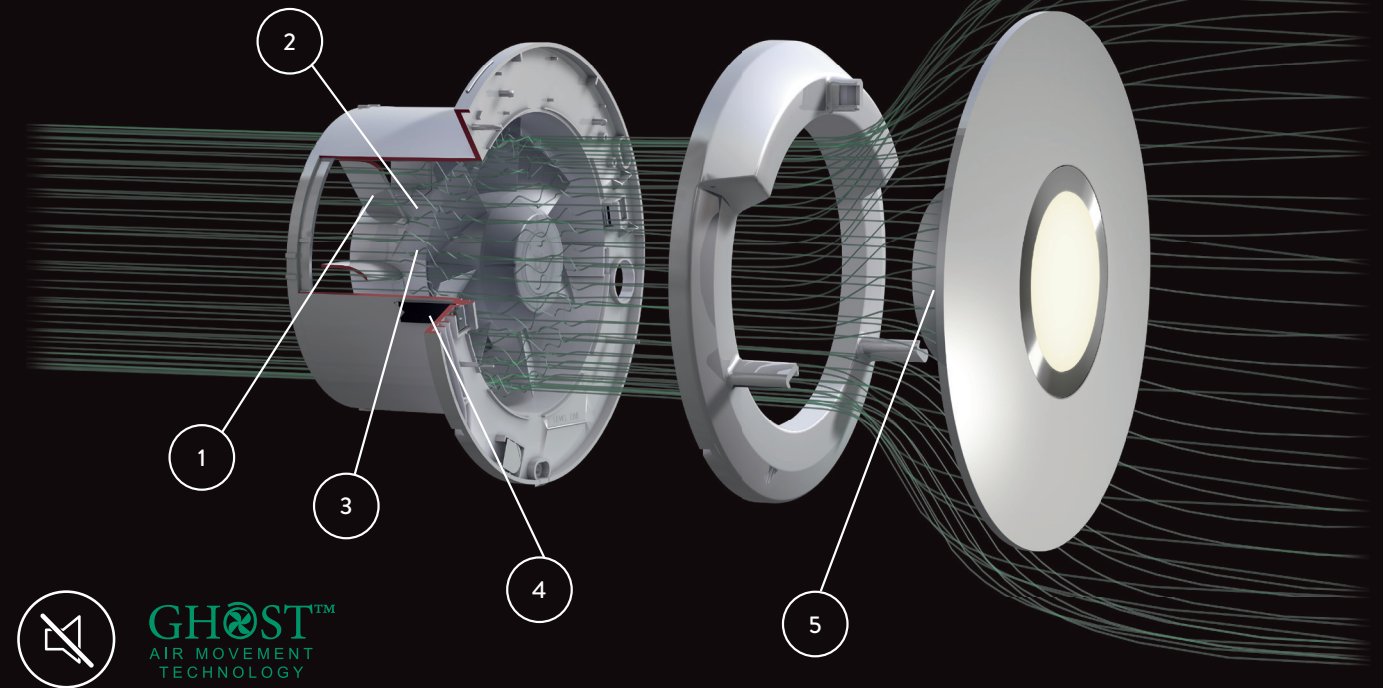

Use the level reference to ensure a flexible and accurate fan alignment.

No screws needed

The hook and clip fan cover on the Simply Silent™ Shower Fan Complete allows for quick, fuss-free installation.

Simply Silent™ Illumi Shower Fan Complete

The Simply Silent™ family of purpose-designed in-shower fans use unique, innovative Ghost™ Air Movement Technology to deliver near-silent running.

Fan noise comes from both the motor and the movement of air. To combat this, Ghost™ Air Movement Technology uses long-life silent running motors and precision engineered components to avoid mechanical noise, while advanced air flow management eliminates irregular air flow paths and turbulence.

A look inside

1

Flow straighteners guide air through the duct, reducing turbulence.

2

Long-life ball-bearing motors suppress motor noise.

3

Optimised impeller blade design maximises performance, while minimising noise.

4

So Simple in-shower installation with use of quick fit clamps.

5

Sleek stylish fascia design with warm white LED light available specifically for the Illumi.
